Developmental Medicine and Child Neurology

Volume 38 1996

INDEX

Authors and subjects of articles in the body of the journal are indexed together. Co-authors of all articles are cross-referenced to the first author. Book reviews and abstracts are listed separately. A = *annotation;* E = *editorial;* L = *letter.*

Key to issues and pages

Issue	*Pages*	*Issue*	*Pages*	*Issue*	*Pages*
No. 1	1–94	No. 5	377–470	No. 9	753–846
No. 2	95–188	No. 6	471–564	No. 10	847–940
No. 3	189–282	No. 7	565–658	No. 11	941–1034
No. 4	283–376	No. 8	659–752	No. 12	1035–1128

Ability and dependency in adolescents with severe learning disabilities, 48
Abstracts
Finegan JAK. *et al.*: Children whose mothers had second trimester amniocentesis: follow up at school age, 750
Kohn DB. *et al.*: Engraftment of gene-modified umbilical cord blood cells in neonates with adenosine deaminase deficiency, 87
McLean M. *et al.*: A placental clock controlling the length of human pregnancy, 86
Meberg A and Broch H.: A changing pattern of cerebral palsy.
Declining trend for incidence of cerebral palsy in the 20-year period 1970–89, 467
Reuss ML. *et al.*: The relation of transient hypothyroxinemia in preterm infants to neurologic development at two years of age,749
Rothman KJ. *et al.*: Teratogenicity of high vitamin A intake, 86
Zahr LK. and de Traversay J.: Premature infant responses to noise reduction by earmuffs: effects on behavioural and physiological measures, 468
ADHD, DAMP and other neurodevelopmental/psychiatric disorders in 6-year-old children: epidemiology and co-morbidity, 891
Adolescents with severe learning disabilities, ability and dependency in, 48
Adrenal hyperplasia, congenital, elevated androgen, brain development and language/learning disabilities in children, 423
Adverse events and complications, lessons from clinical research, 565(E)
Advocacy, call for, 471(E)
Aerobic power, peak and isokinetic muscle strength, reliability of tests to determine in children with spastic

cerebral palsy, 1117
AHMED M and DUTTON GN.: Cognitive visual dysfunction in a child with cerebral damage, 736
